FSLs 101
Shoulder & Arm Building Tool

Product has single function and two separate stations. Even handicapped can easily use these tools. It helps to work and stretch different muscle groups such as forearms, biceps, triceps, shoulders, neck and chest. So that blood flow and oxygen absorption increase in these body parts.

FSLs 104
Double Step Tool

Product has single function. It helps to stretch and strengthen the different muscle groups such as calves, quadriceps, hamstrings, forearms and chest. So that blood flow and oxygen absorption increase in these body parts. You may perform well in synchronization with your sports buddy.

FSLs 102
Double Leg Stretching Tool

Product has single function. It helps to stretch and strengthen the different muscle groups such as quadriceps, hamstrings and glutes. Tool helps you swing left and right and help to avoid belly injuries if used properly.

FSLs 105
Bicycle and Step Tool

The product has two different functions. It helps to work and stretch different muscle groups such as lower back, glutes, calves, quadriceps and hamstrings. So that blood flow and oxygen absorption increase in these body parts. While one side mimics basic cycle steps, other side helps to balance your weight.

FSLs 103
Space Walking Tool

It provides stretching and strengthening of the front and back muscles in the lateral region of the legs and the joints and muscles in the waist and leg joints of the body, accelerating the blood circulation in this part of the body and providing more oxygen to the muscles. By stretching your legs easily, you will enjoy your time in the tool.

FSLs 106
Waist Stretching Tool

It provides stretching and strengthening of the front and back muscles in the lateral region of the legs and the joints and muscles in the waist and leg joints of the body, accelerating the blood circulation in this part of the body and providing more oxygen to the muscles. By stretching your legs easily, you will enjoy your time in the tool.

FSLs 107
Body Building Tool

The product provides three separate functions, to work the front and back muscles in the upper part of the body and the arms and legs, to accelerate the blood circulation in this part of the body, to get more oxygen to the muscles. You may try different fitness exercises in same tool.

FSLs 110
Sit-ups Station

The product provides two separate functions, to work the Abs muscles, lower and upper back muscles and to accelerating the blood circulation in this part of the body and providing more oxygen to the muscles. Helps you to build your 6 packed abs.

FSLs 108
Leg Press Tool

Product has single function. It helps to stretch and strengthen the different muscle groups such as quadriceps, hamstrings and glutes. So that blood flow and oxygen absorption increase in these body parts. Strengthen your legs with your exercise partner.

FSLs 111
Air Walking Tool (Single)

The product provides two separate functions, especially it helps to work and stretch the front and back muscles in the lateral and lower parts of the legs. By providing the rhythmically coordinated exercise of the hand-arm and legs, with the help of walking, which is a heart exercise, it enables the heart to work regularly, to accelerate blood circulation and to get more oxygen to the muscles.

FSLs 109
Pull-up Tool

Product has three separate functions. It helps to work and stretch different muscle groups such as upper back, chest, traps and neck. So that blood flow and oxygen absorption increase in these body parts.

FSLs 112
Double Bike Tool

Product has single function and two separate stations. The product allows us to sit down and do pedaling movements and it helps to work and stretch different muscle groups such as quadriceps, hamstrings. So that blood flow and oxygen absorption increase in these body parts.
